Document Generation

We can help you transform your document generation process. Our system automatically evaluates your transaction information at each stage of the origination cycle ensuring quality and accuracy. Optimized for performance, our document generation engine will process your entire document package with 100+ pages in seconds.

Not just any documents ... we call them *intelligent* documents.

Data & Document Accuracy

Our multi-dimensional rules-based engine dynamically determines the correct eForms needed to produce your fully-compliant document package.

Evidence of Compliance

Our Loan Detail Report summarizes your transaction-specific information, calculations, data validation, and anti-predatory lending analysis into a single easy-to-read document for Compliance review.

Data Centric

We use a data-centric approach for gathering your loan information and do not rely on document-specific input screens.

Limitless Integration

DocMagic's robust document generation API powers the seamless integration with numerous Loan Origination and Point of Sale platforms.

Workflow Intelligence

DocMagic's workflow intelligence includes e-Enablement for electronic signatures, barcodes for identification and indexing, and embedded content to help you move things along smoothly after your package is generated.

MISMO SMART Doc®

Document formats include static templates, dynamic layouts, as well as MISMO SMART Doc, the framework for implementing all aspects of the digital mortgage process.

Our document generation solution and compliance expertise will transform how you process loan documents.
