

Secure eChattel with SmartTRANSFER

SmartTRANSFER gives you compliant control of your electronic records. We make it simple to transfer and store everything from loans and leases to insurance attestations and contractual obligations. SmartTRANSFER is powered by our award-winning SmartSAFE® eVault—allowing you to streamline collateralization and create securitized asset pools. Our system ensures secure access to authoritative copies and all linked documents.

Let us help you with all your electronic records and eChattel business needs!

Be efficient

Improve your capital workflow through real-time bulk management of security interests.

Choose your format

Storage and support for all data types and formats including both electronically and wet-signed documents.

Go paperless

Cut your operational costs by storing and managing documents electronically.

Maintain integrity

Retain a tamper evident seal to ensure data and document integrity.

Increase transparency

Enhance trackability with a comprehensive audit log and offer more flexibility in managing portfolios.

Grab control

Access, manage, and transfer records in real-time and store them on a short or long-term basis.

Validate electronic records

Automatically validate the integrity of transferable electronic records.

Allow secure access

Provide instant and easy delivery to investors, servicers, and sub-servicers.
